Edit advanced config? (y/n)
y) Yes
n) No (default)
y/n> n
Remote config
Use auto config?
* Say Y if not sure
* Say N if you are working on a remote or headless machine
y) Yes (default)
n) No
y/n> n
For this to work, you will need rclone available on a machine that has
a web browser available.

For more help and alternate methods see: https://rclone.org/remote\_setup/

Execute the following on the machine with the web browser (same rclone
version recommended):

    rclone authorize "onedrive"

Then paste the result below:
result>
```

## Insert an Image of An Installer

Referencing a link using COMSOL Documentation on Multi-threading:

Cras pulvinar ligula ac nisi porttitor, volutpat congue orci tincidunt. Pellentesque non mi congue, porta enim eget, venenatis sem. Integer suscipit vulputate tellus, eget commodo dolor gravida vel. Suspendisse gravida gravida ligula, in interdum sapien molestie ut.

### Yet another analysis

In ut vehicula risus. Refer to the table above!

Remember equation (??)!

## Conclusion

Caution Symbol

Be careful box!

A tip symbol

A note symbol

I have something **important** to say here!

Figure 1: Two-pane View of Local and Remote Filesystem

$$\frac{\sum_{i=1}^n X_i}{\sqrt{b^2 - 4ac}}$$

This is an equation in line  $x_{ij}$

## Placing video files in RMarkdown document
